### **THE FOREWORD**

**“Yesterday is history , Tomorrow is a mystery , but Today is a gift and that is why it is called as Present”. The year 2021 has been a unique experience for the whole humanity. As people have adjusted and accepted the new norms of safety, we at KMS have been engaging the students remotely to continue the teaching - learning process in a "Teach-From- Home- Students-At-Home" situation.**

**This newsletter is a platform for students to articulate the challenges and the myriad ways to overcome the insurmountable obstacles in life. We are thrilled with the wide range of ideas and emotions that our students have expressed through the articles and activities. We congratulate all the students for their efforts. We hope they continue to further hone their artistic talents for the betterment of all.**

**Warm regards  
Take a reading tour through this newsletter.**

# *Vision & Mission of School*

## MOTTO

*विद्या विनियोगात् विकासः*

*vidyā viniyogāt vikāsaḥ*

(Progress comes from proper application of knowledge)

## VISION

We believe in rationalistic approach to support the holistic growth of our students. We envision a safe, happy, inclusive and stimulating learning environment that will help to discover, nurture and bring to fruition the treasure within. Our aim is to produce healthy, innovative, responsible life-long learners striving for excellence through collaboration committed to the progress of a global society.

## MISSION

- To promote each child's social, cultural, emotional, physical and cognitive development by providing a stimulating learning experience to maximize skills, competencies and values.
- To create a sense of belongingness among students pertaining to diverse families and cultural backgrounds by acknowledging, accepting and meeting differing needs of students and also by providing a happy, safe, supportive, inclusive learning environment with a welcoming atmosphere for a harmonious and prosperous society.
- To focus on maximizing each child's sense of wellbeing and acquisition of skills for life and learning beyond school by supporting and nurturing the children's natural desire to be life-long learners through multidimensional curriculum, motivated teachers, quality infrastructure and also by celebrating their achievements.
- To have a transformative impact on society by ensuring sensitivity and commitment towards environment and all beings through collaboration, continual innovation in education, research and creativity.

# *Chairman's Perspective*

*"Our mission at Kamal Model is to focus on momentum & perfection of students"*

**Dr. Ved Prakash Tandon**  
**Chairman , Kamal Model Senior Secondary School**

**"Dreams do come true, but not without the help of others, a good education, a strong work ethic, and the courage to lean in." I am proud to see how soon all KMS fraternity along with its students have been able to adapt to first online mode and again offline classrooms. This institution breathes today with the desire to mould these young minds for a better future. And I feel a surge of pride in acknowledging that we all have kept these empty buildings breathing and fulfilling their purposes even from a great distance.**

**This institution and I feel honored to have been a part of this educational journey. Like any good educational institute, KMS carries a great responsibility of shaping the future of many families and nation by developing ethical and industrious human resources. Our utmost attention is on untapped talent and intellect of all students and further to expand the horizon of academia by fulfilling academic needs of students of this great institution. I believe in the established notion of three constants in life... change, choice and principles.**

**The aim of KMS has been to align our pedagogical practices with the change in outside world, staying true to the timeless principles that produce success. In the past decade with tremendous efforts, our team has provided vast exposure to our children and empowered them to participate in activities and events that harnessed their curiosity and inspired them to explore the world around them. This school newsletter is a creative pursuit which encloses the originality of thoughts and viewpoint of our KMS.**

**The contents of the newsletter reflect how beautiful and insightful these minds can be. It also showcases their endless imagination. On completing this thoughtful compilation of creativity and perception, I congratulate the Principal, staff and students of KMS and wish them best for this journey on the road to excellence.**

# *Principal's Perspective*

*A Pursuit to perceptual learning...*

**Dr. Vandana Tandon**  
**Principal , Kamal Model Senior Secondary School**

**EDUCATION IS A SHARED COMMITMENT BETWEEN DEDICATED TEACHERS, MOTIVATED STUDENTS AND ENTHUSIASTIC PARENTS WITH HIGH EXPECTATIONS"**

Today, the role of a school is not only to pursue the academic excellence but also to motivate and empower the students to be lifelong learners, critical thinkers, and productive members of an ever-changing global society. Converting every individual into a self-reliant and independent citizen, our school provides an amalgam of scholastic and co-scholastic activities.

The world today is changing at such an accelerated rate and we as educators need to pause and reflect on this entire system of education. "To Motivate the Late bloomers, To mould the Mediocre and To Challenge the Gifted" is the teaching notion. Providing good quality modern education including a strong component of cultural values, environment awareness and physical education to children in rural areas irrespective of their family's socio-economic condition is the prime motto of KMS. A committed and supportive management, dedicated teachers, caring and co-operative parents blend harmoniously to create this school as a child-centric school.

There is something for everyone here. The variety and creativity of the articles in the magazine pages represent the talents of KMS faculty. I congratulate the entire team for their hard work and dedication. The reflection of the students' and teachers creativity is the epitome of the magazine. I am sure that the positive attitude, hard work, sustained efforts and innovative ideas exhibited by our young children will surely stir the mind of the readers and take them to the fantastic world of unalloyed joy and pleasure. "Success comes to those who work hard and stays with those who don't take rest on the laurels of the past"

With warm wishes...

# *Our Academic Grandmaster*

**Mrs. Pramila Mishra**  
**Academic Director , Kamal Model Sr. Sec. School**

We are living in a fast changing world. The pace of change is indeed so fast that almost everything seems to be in transformation mode. Since education cannot exist in isolation, the system needs to take cognizance of these developments. Education all over the world is undergoing a radical shift. Knowledge is no longer constrained by time and space. It has expanded beyond the classrooms and school campuses.

Hence, continuous mentoring, monitoring and evaluation of the learning environment needs to be done to provide required intellectual stimulation to the young minds. In today's world, how much you know does not matter, application of the acquired knowledge is more important. This is where excellence in present day education lies.

Youth of today exhibits unparalleled genius and is to be prepared for global stage. Our pedagogical practices have to shift from teaching to learning. In emerging global dynamics, educators have to play the role of change managers. While creating curriculum designs, value orientation should remain in prime focus. KMS aims at grooming the students into ethical and principled leaders of tomorrow, whose thoughts and actions are deeply embedded in the values and culture of our land. As a premier educational institution, we are known for creating our own benchmarks and elevating ourselves to higher planes. This practice has made our group schools, the center of excellence. However , learning, evolving and effort will never cease.

# Our Academic Grandmaster

**Mrs. Pushpa Jindal**  
**Academic Coordinator , Kamal Model Sr. Sec. School**

The aim of education is to enlighten one's mind so that one could have a broad mind as well as a broad outlook. Education presents the truth of life in a beautiful way for the well being of human race. The truth of life is imparted to students as the essence of knowledge. Children are made not only professionally perfect but also morally sound to follow the path of truth by which they not only overcome complicated problems but also morally sound to follow the path of truth by which they not only overcome complicated problems but also taste the nectar of success in life.

The real purpose of education is to create better human beings. Aspiring to become the best is the motto of every student. It is equally important for the teachers to put their tireless efforts in the right direction. To make a child academically strong is comparatively easier than to inculcate human values and make him strong morally and ethically.

Originality and a feeling of one's own dignity are achieved only through hard work. Hard work has no substitute. Only those who work hard, succeed. A student can never come out with flying colors unless he or she has really worked hard throughout the year.

Burning midnight-oil paves the path of success. It never passes into nothingness. According to Albert Schweitzer "If a person loves what he is doing, he will be successful."

Be a person not a machine. Don't accumulate degrees rather inculcate ethics and values.

# *Our Academic Experts*

**Mrs. Mansi Behl**  
**Coordinator, Class I & II**

**Focus on the journey not the destination. Joy is found not in finishing an activity but in doing it.” Learning is the process of constantly updating in an ever changing world. Learning at KMS is based on the fundamental principles of life; teaching the children to be courageous, confident, disciplined, responsible and loyal.**

**Education at our school provides a foundation for a life time of learning and is great fun too. In the light of same, KMS has adjusted the sails to ace the sweeping winds of change. The aim is to equip the students to emerge as holistic human beings who continue to grow in knowledge, curiosity, courage, creativity, achievements, confidence, competence with a sense of fulfillment and understanding.**

**The task of building a new child must find support in our school, where our young students must be educated in a new perceptive, so that they can bring about a change in the dynamics of human relation in the world outside. I hope and pray that the students of our school will scale great heights and keep the school’s flag high. May God intercede for all who enter the school campus.**

# *Our Academic Experts*

**Mrs. Jaspreet Kaur**  
**Coordinator, Class Nursery & Prep**

**The journey of a thousand miles begins with just a single step, the graph that plunges forth showing rapid development begins with just a single dot and the huge banyan that stands tall begins with just a seed so does a dream manifest itself into laudable action. As we take the first few steps towards coordinator ship for the coming years we are filled with immense gratitude for having been given this opportunity.**

**We firmly believe that our task is herculean yet with faith, steadfastness and support our journey becomes easier. The most important function of education at any level is to develop the personality of the individual and get a deeper comprehension of the significance of his or her life to himself or herself and others.**

**Our approach is the promise of a strong commitment to active and student centered learning for we affirm that learning does not come only from receiving information, but also through critical thinking and deep reflection. It is a lifelong exercise that can be unbelievably exciting, if only we wish to jump onto the train of experience and take a trip to every conceivable place on the earth.**

**We intend to dedicate this year to a correct understanding of what education really means so that in the coming years we contribute meaningfully and benefit from this understanding. We humbly ask for providential blessings as we march to face the challenges that every new day might bring.**

**“The Mirror Of Ideas”**

**“EXPERIENCE IS THE BEST TEACHER OF ALL THE THINGS”**

I'm highly obliged and overwhelmed to be given an opportunity by playing a role in editing the KMS Newsletter “The Phoenix”. It gives me immense pleasure to come to the fact of having been associated with this editorial group and working with such profound teachers. I must say everything had been a bliss with the scents of alluring learning flowers along the journey.

**“What a Teacher writes on the blackboard of life can never be erased.”**

I am really thankful to our respected Principal Ma'am for entrusting me with the responsibility of editing KMS newsletter - "The Phoenix". The reflection of the student's creativity and achievements is the epitome of this newsletter. At last, I take the opportunity to thank all the contributors as their contribution is the reason that makes this magazine endearing with our readers.

# Republic Day Celebration

## A REPORT

India won her freedom on 15th of August, 1947 and became a Republic on 26th of January, 1950. The new constitution of free India came into force with effect from this day. So the day is celebrated with pomp, zeal and spirit at Kamal Model Sr. Sec. School where tiny tots of class Prep paid sincere homage to our freedom fighters by speaking a few sentences about them as well as talking about the national symbols of India. They also participated in different Republic day activities with enthusiasm.

# ***WORLD POLLUTION PREVENTION DAY***

## **A REPORT**

The environmental pollution, directly and indirectly, affects the quality of life more than one can imagine. All this is mainly caused by human activities which harm the environment in ways more than one. Nowadays , pollution prevention is a major global concern because everyone on the earth is entitled to clean air to breathe, water to drink, and to enjoy public lands thus, to spread awareness on managing and controlling industrial disasters and to prevent the pollution produced by industrial processes or human negligence our students take small initiatives in form of slogans, posters, small activities, etc to control the pollution.

# ELGA Helping Verbs Activity

## A REPORT

We organized an activity on the concept of Helping verb to make students understand better and effectively. Students of class 1 performed activities like-cutting of flowers ,circle and writing down pronoun and helping verb on it. Then they matched pronoun words with their respective helping verbs .Students learnt helping verb through pronoun .This activity helped them to learn the concept efficiently and constructively. Through this activity they got a chance of critical thinking to build up the concept.

# World Human Rights Day

## A REPORT

"A well taught child is a well taught future."

Following these words, Kamal Model Sr Sec School took the liberty of teaching the children about their human rights in general on the occasion of World Human Rights Day and also held a poster making activity regarding the same where children collaboratively created some beautiful posters.

# HUMAN RIGHTS

# KARGIL VIJAY DIWAS

## A REPORT

A soldier is the man or woman who fights for his/her government and carries the weapons, risking his/her own life in the process. A virtual activity of the observance of "Vijay Diwas" was conducted in class 1 on 16 Dec 2021. Kamal Model Sr. Sec. School celebrated this day to remember India's war victory and to pay tribute to Kargil Martyrs who are the symbol of courage and sacrifice for safeguarding the border of the country. Teacher explained the importance for this memorable day. And also teacher helped the students to make different posters.

# TOY MAKING ACTIVITY

## A REPORT

Toys are kids' best friends and if those toys are made by themselves, their happiness knows no bounds. Toy Making Activity was conducted for the students to trigger their creativity, thinking and imagination. The little ones took part in this activity with great enthusiasm turning ordinary objects into amazing toys. Also, the students got a platform to showcase their talents and interest. Through this activity we can build child's cognitive, physical and social development.

# *Makar Sankranti*

## A REPORT

*On the occasion of Makar Sankranti and Lohri, may the brightness and warmth of the glowing sun light up our lives with positivity, love and happiness!*

The festivals of Makar Sankranti and Lohri were celebrated by the enthusiastic students of class 1. The emphasis was on the importance of celebrating our traditional Indian festivals with great joy and pride.

Link for Video

<https://youtu.be/kswsvS8k0Kk>

# LOHRI CELEBRATION

## A REPORT

Lohri the festival which ushers in the joyous spring and birds adieu to the hard winter, was celebrated with great enthusiasm on 13th January 2022. The mood was upbeat and the children actively immersed in the festive spirit. Our little ones of Class 1 were told about the significance of the festival first, with the help of a video. Also, folk songs were played to make the mood and soon everybody joined in the energetic rhythm! Peanuts, popcorn and gajak were eaten by the students virtually. And students used peanuts peels to write Happy Lohri on a page. Kids were very excited and enjoyed the day a lot.

## **Mother Tongue to be instated as medium of instruction:**

Home is the first classroom for a child. When a child enters a structured learning environment in the form of the school, there is already a tremendous amount of adjustment and adaptation going on. Now, imagine starting school and not able to understand the teacher! There can be no greater stress on a child than this. Having to understand a foreign language while already going through other major changes impedes the learning process. When the medium of instruction is the mother tongue or local language, the child will learn concepts faster, adjust better, and show gains in learning quicker. This extends to parental participation in schooling, as well. In India, due to a lack of fluency in English, parental participation is sometimes limited. A switch to the mother tongue would potentially create a much stronger school -parent partnership which, in turn, would help in laying a rock-solid foundation for a child's education. - **Bharti**

## **Parental responsibilities in the Special Education:**

Some of the following suggestions may be helpful to the parents:

- Develop a partnership with the school and share relevant information about your child's education and development.
- Ask for clarification of any aspect of the program that is unclear to you.
- Make sure you understand the program specified in the IEP or IFSP before agreeing to it or signing the form. Take the IEP or IFSP form home to review it before you sign it.
- Consider and discuss with your child's teacher how your child might be included in the regular school activities program.
- Monitor your child's progress and periodically ask for a report.
- Discuss with the school any problems that occur with your child's assessment, placement, or educational program.
- Keep records of all the discussions, meetings as well as phone conversations you want to remember.
- Join a parent organization to share knowledge and gain support.

- **Rajbir Kaur**

## **Impact of NEP on policy on Preschool**

The National Education Policy is very promising and futuristic which takes into consideration that the first 1000 days are very crucial for the child. Therefore, the right kind of early childhood environment is very important for each child. The gap between the existing learning outcomes and the outcomes which are actually required, must be bridged by undertaking major reforms that bring the highest quality, equity, and integrity into the system, right from early childhood care and education through higher education. . Currently, children in the age group of 3-6 are not covered in the 10+2 structure as Class 1 begins at age 6. However, the new National Education Policy is based on 5+3+3+4 structure wherein a strong base of Early Childhood Care and Education (ECCE) from age 3 is also included. – **Geetanjali**

## **Schooling to begin from the age of 3 years.**

The best age to start pre-school is considered to be 3 years. Kindergarten school is considered to be the first stepping stone in to the world of formal education.

Every child is unique and different when it comes to their abilities and capacities to adjust to a social environment and kids starts new journey and learned all the basics of pre school.

Toddlers are learning and adapting various sets of skills during this period. They want to play games, Share things.

Children who join nursery school are expected to have

Self Control

Conversation

Skills

Ability to focus

Ability to follow instructions.

Knowledge of basic:-Alphabets, Numbers, Shapes, Colours, Concepts, etc. – **Sonia Taneja**

## **Importance of Homework**

Different people have different perspectives regarding homework. Many people feel that homework is simply a waste of time. However, the reality is its exact reverse. Teachers and schools professors think that homework is an integral part of learning and it is for the betterment of the students. Even researchers have found that homework is crucial for the students. In general, homework is an out-of-class activity/assignment allotted to the students as an extension or revision of classwork. There are several benefits of homework for the students. Let's have a look at some of these: homework Improve memory, students learn to make good use of time, they become independent, learn responsibility, get ready for next day class, learn to use resources, it allow students to explore subject and parents get involve in their child's study. It also improves academic performance, allow students to revise classroom learning and built the habit of self - study, increases their concentration and develop essential life skills. We teachers understand the significance that is why we give homework to each student. Self study is also a vital part of student's schedule so that they can build their concepts in scoring well along with gaining skills such as problem solving, time management, confidence and a sense of responsibility. – **Ekta Vats**

## *A Thought on Nature..*

### **Nature's Beauty**

---

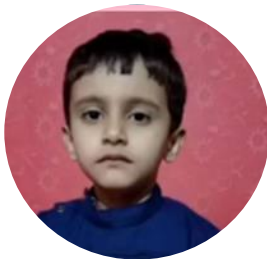

It has been two years since they were neighbours. Now they are both grown up and beautiful. One could easily note out the difference in them as a kid and present day. The charm and shine made the onlookers admire them.

Last winter they had first tried to express their feelings. Fragrant and colourful flowers were their first expression of love in that year's spring. But in the harsh summer they chose to be muffled.

Finally the rain drops made their soul realise the importance of each other. They spread out their 'branches' and hand in hand they danced their heart out.

KMS celebrates each milestone as we prepare for a thriving path ahead....
