Principal's Perspective

Dr. Vandana Tandon

"The education is not a preparation for life but it's life itself".

John Dewey, American Education Reformer

As the Principal of the school, I strongly believe in his words. I feel honoured and privileged to be part of an educational institution where every stakeholder is a learner and every day is an opportunity to learn and discover. We are focused on a well-rounded and effective educational practice needed for the capacity building of our children.

This will develop skills that will drive their employability, productivity, health and well-being in the decades to come and ensure overall progress.

E-WASTE

E-waste is a popular informal name for electronic products of our useful life.

Computers, televisions, VCRs, stereos, and fax machines are common electronic products that can be reused, refurbished, or recycled. Thus, this selective treatise attempts explicitly to present an e-waste management module for the school environment so that the students of KMS are sensitized about e-waste. The kids were asked to share their suggestions for reducing electronic trash and shifting the focus to simply managing electronic waste generated at the school. They took the pledge to collect e-waste and sent it to the nearest collection centre.

Learning with the Counsellor

Growing Up Healthy

A workshop was conducted by KMS on the theme of "Growing Up Healthy" for its adolescent kids, as puberty can be a challenging time for them; things like physical changes can bring self-consciousness and hormonal changes can trigger emotions. This workshop helped them learn more about the facts of puberty that helped them understand what is happening at a physical and emotional level. This workshop helped kids to ease the anxiety that may be associated with this stage of life.

Personality Development

Mrs. Preeti Sinha, the School Counsellor and the Resource Person, conducted a workshop for the students with the motto "The better you become, the less time it takes for you to achieve your goals". 'Personality Development' or 'Self-improvement' consists of activities that develop a person's capabilities and potential, build human capital, facilitate employability, enhance the quality of life, and enable the realization of dreams and aspirations.

Time

Management

The most crucial process or act in planning and exercising conscious control over the amount of time spent on particular activities, particularly to boost productivity or efficiency, is Time Management.

KMS organized a session on 'Time Management' for students to aid them in strengthening their capacity to schedule and manage their time effectively to accomplish their goals. This session proved to be very useful to the students.
